

# Star Clock

**THE TIME IS**

The diagram shows the Big Dipper constellation at the top right, the Little Dipper at the bottom, and the North Star (Polaris) in the center. A dashed line connects the two stars at the end of the Big Dipper's bowl to the North Star. The Little Dipper is shown below the North Star, with its handle pointing towards the center.

**STAR CLOCK**

**How To Use Your Star Clock—**

- Go outside and find the Big Dipper and North Star.
- Face the North Star.
- Turn the outer circle of the Star Clock so the current month is at the top.
- Turn the inner circle until the picture of the Big Dipper lines up with the Big Dipper in the night sky.
- Read the time in the window. Remember to add an hour if it's daylight saving time.
